Re: New East Bridgewater Jr. & Sr. High School
Summary comparing the project design, as represented in the 50% Construction Document
submittal, to the project design represented in the prior 100% Schematic Design submission for
Final Design Program requirements

Dear Mr. Alles:

The 50% Construction Document Design submittal is based on the adopted Model High School, with exterior façade modifications representing the desired East Bridgewater architectural style and plan adjustments to accommodate the approved East Bridgewater Jr. & Sr. High School Educational Program. There are no deviations from the East Bridgewater Jr. & Sr. High School Final Design Program and no substantive changes from the prior 100% Schematic Design submission.

Sincerely,

A handwritten signature in black ink, appearing to read 'James S. Jordan', is written over the typed name below.
