

August 2011 update

As the [100% Construction Documents](#) become available on this website, the amount of information posted here increases substantially. The menu bar at the top of each webpage will bring you to an amazing amount of information — valuable both for those of you in the community who simply want to be informed *and* those of you who are construction professionals interested in participating in the actual building project.

The final results of the Geotechnical and Structural Peer Review have been received, indicating that the original plans were fully acceptable. The report has been submitted to the Massachusetts School Building Committee.

On August 4th, bids will be opened and the public face of this project will move closer to becoming more visible — the community will begin to see firsthand the work that, until now, has only taken place in meetings and offices. We hope to share the exact date for the groundbreaking soon.

The School Building Committee will meet twice in August in the Town Hall 2nd floor conference room. Please check the [News & Updates](#) page for details.

As ever, thank you for your interest and support in this project.

Sincerely,
The School Building Committee
