

June 2012 update

At this time, the structural steel work has been completed. Work on the exterior envelope has begun, including masonry blocking and light gauge metal framing. The roof installation of the gymnasium is underway. Concrete floors were installed on the 2nd and 3rd floors of the building and installation of under slab utilities continued in preparation for concrete placement on the 1st floor.

The programming for Furniture, Fixtures and Equipment (FF&E) has begun. Faculty and staff are meeting with an FF&E consultant to establish specific needs for each department.
