

## October 2011 update

At long last, the new school project is moving along and more visible to the community. You have probably noticed some big changes in the field behind the high school. Trees have been picked up and carted away (quite literally!) and many pieces of large equipment and trailers have moved in.

On Tuesday, September 13, a groundbreaking ceremony was held. Some of the guests included: Massachusetts School Building Authority Executive Director Katherine Craven, State Senator Brian Joyce, and State Representative Geoff Diehl. In addition, former school administrators, staff from all three schools, representatives from ABC, Town Hall, parents, students, community members, and our OPM were also on hand to celebrate the occasion. The School Building Committee appreciates the efforts made by everyone to mark this important moment. Please click [here](#) to view photos of the groundbreaking.

The SBC has set its schedule for the next few months and will be meeting every 2<sup>nd</sup> Monday (except for Monday holidays when the meeting will be held the next day) in the High School Library through January 2012. The October meeting will be held on Tuesday, October 11 at 7:00 PM. You can find future meeting dates by clicking [here](#).

Please make it a habit to return to this site regularly for new information and watch for the installation of a camera, which will allow real time viewing of the building progress. We continue to appreciate your interest and support.

Sincerely,  
The School Building Committee
